Key Information Document

Version exclusively for the United Kingdom

Bitwise®

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Name of the product	Bitwise Solana Staking ETP
Product numbers	ISIN: DE000A4A59D2
PRIIP manufacturer:	Bitwise Europe GmbH ("**Issuer**") (https://bitwiseinvestments.eu). The Issuer forms part of the Bitwise Group.
Phone number	+49 69 8088 3728
Competent authority of the manufacturer of the product	The Federal Financial Supervisory Authority (BaFin) Germany is responsible for supervising the Issuer in relation to this Key Information Document.
Key information document created:	03/11/2026 21:04 (version 1)

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

The product is a bearer bond under German law that is secured by Solana deposited in a depositary for safekeeping.

Term

The product does not have a fixed term, subject to exercise by the investor or termination by the Issuer.

Objectives

Investors who wish to invest in the cryptocurrency Solana ("**Solana**") as specified in the "Underlying" field in the table below and to participate in rewards associated with the staking of Solana (**"Staking Rewards"**) as part of their investment strategy can purchase this product, the value of which is based on the Solana price and calculated by reference to the Compass Crypto Reference Index Solana (the "**Index**"), on the secondary market or from an "Authorised Participant". The product is purchased through the secondary market in fiat currency. Payment of the product purchased through an Authorised Participant may be made either in Solana, in another cryptocurrency or in such fiat currency as the respective Authorised Participant accepts.

Solana received by the Issuer as consideration from the sale of the product to Authorised Participants are transferred to a designated security account as collateral. Other cryptocurrencies or fiat currency received as consideration from the sale of the product will be converted to Solana and then also transferred to the respective security account as collateral. This means that for each unit of the product in circulation, a predefined Solana amount is available to hedge the product (the **"Cryptocurrency Entitlement"**). At the time of issue, this is 0.05 Solana. The Cryptocurrency Entitlement is determined by taking into account a management fee of 0.85% of the Cryptocurrency Entitlement of each unit of the product annually (approx. 0.0023% every day (= 1/365 of 0.85%)) and the Staking Rewards received for the staking of the units of Solana held as collateral, in each case calculated on a daily basis over the entire holding period of the product. This means that the Cryptocurrency Entitlement per share, depending on the ratio of the management fee to the Staking Rewards, may either increase, decrease or remain constant from day to day. Solana held to back the product are held institutionally by BitGo Europe GmbH, a regulated custodian by the Federal Financial Supervisory Authority (BaFin) (the **"Depositary"**). The Issuer has appointed Law Debenture Trust Corporation p.l.c. (the **"Collateral Trustee"**) as a collateral trustee to hold the collateral rights for the Solana deposited with the Depositary on behalf of all current and future holders of the product.

Voluntary Redemption by the Investor: An investor may sell the product anytime on the stock exchange. Alternatively, investors have the right to demand redemption of the product in whole or in part, with the Issuer or an Authorised Participant (certain terms and conditions apply) at any time. In case of a Voluntary Redemption, repayment generally takes place by delivery of Solana. The Investor's claim to repayment corresponds to the Cryptocurrency Entitlement on the repayment date less repayment fees. An Authorised Participant or the Issuer transfers this claim to the Digital Wallets specified by the Investor on the repayment date. Alternatively, investors may request payment in US dollars (**"USD"**). The investor will then receive an amount of money in USD equal to the sales proceeds of the collateral Solana obtained in an execution procedure.

Mandatory Redemption by the Issuer: The product terms and conditions also state that, if certain events occur, the Issuer may repay the product prematurely in Solana or, if an investor decides to do so or if it fails to perform the cooperative acts required for a physical settlement, in USD. These events are explained in more detail in the product terms and conditions. It is likely that any return the investor receives in the event of such early repayment will be different from the scenarios described above and may be considerably less than the amount that the investor invested upon purchase. Total loss is also possible. Furthermore, investors run the risk that termination will be requested at a time that is unfavourable to them and that they will only be able to reinvest the terminated amount on worse conditions.

Underlying	Solana (Compass: SOLTRM)	**Product currency**	US Dollar
Issue Date	02/12/2024	**Trading Day**	A day on which the Frankfurt Stock Exchange is open.
Cryptocurrency Entitlement per unit of security	Initially 0.05 Solana, subject to the Management Fee and Staking Rewards	**Mandatory Redemption**	The Issuer is entitled to Mandatory Redemption if certain events occur, as stated in the product conditions.
Management Fee	0.85% p.a.	**Staking Rewards**	The daily amount of units of Solana received as reward for staking minus a fee of 28.00%.
Rights of bondholders	Holders of the product may sell the product on the secondary market at any time. Alternatively, they may return the product for Solana or the equivalent value in USD (the exact amount is determined in the product conditions).		

Professional investor

The product is intended for professional investors and eligible counterparties who:

- are able to bear a total loss of the amount invested;
- are seeking a speculative investment opportunity that is accompanied by the expectation that the underlying will gain sufficient value over time to exceed any fees;
- have only limited technical capabilities or lack the relevant technical expertise and therefore, instead of investing directly in Solana with the aid of bearer bonds with a value based on the Solana price, would like to invest in Solana without having to hold Solana themselves during the lifetime of the product;
- recognise that the value of the product can change frequently due to the extremely volatile underlying and, as a result, have sufficient time to actively monitor and manage the investment;
- have advanced knowledge and/or experience with comparable financial products and understand the cost structure of the product, including the Cryptocurrency Entitlement that decreases daily.

What are the risks and what could I get in return?

Risk indicator

The Risk Indicator assumes you keep the product for the recommended holding period of 5 years.

You may not be able to sell your product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance at a very high level, and poor market conditions will likely impact the capacity of Bitwise Europe GmbH to pay you. **Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.** This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended Holding Period:		**5 years**	
Example Investment:		**USD 10,000**	
		If you cash in after 1 year	**If you cash in at the Recommended Holding Period**
Scenarios			
Minimum	**There is no minimum guaranteed return. You could lose part or all of your investment.**		
Stress	**What you might get back after costs**	**0 USD**	**0 USD**
	Average return each year	**-100.00 %**	**-100.00 %**
Unfavourable	**What you might get back after costs**	**288 USD**	**0 USD**
	Average return each year	**-97.06 %**	**-100.00 %**
Moderate	**What you might get back after costs**	**7,670 USD**	**132,467 USD**
	Average return each year	**-23.19 %**	**67.51 %**
Favourable	**What you might get back after costs**	**1,438,089 USD**	**48,884,384 USD**
	Average return each year	**13,896.73 %**	**445.28 %**

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor.

The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment between 22/11/2024 and 03/11/2026.
Moderate scenario: This type of scenario occurred for an investment between 31/01/2020 and 31/01/2025.
Favourable scenario: This type of scenario occurred for an investment between 30/11/2016 and 30/11/2021.

What happens if Bitwise Europe GmbH is unable to pay out?

Although the product is secured with Solana, the Investor bears the risk that the Issuer may not be able to fulfil its obligations in relation to the product, for example in the event of the Issuer's insolvency. The Issuer is a special purpose vehicle with no business activities of its own. As a result, the exclusive purpose of the Issuer is to issue this product. For example, the Issuer may only have access to the Solana deposited to hedge the product as a means of meeting all issue or payment claims relating to the product. This product grants you right to the deposited Solana or to the security rights held by the Collateral Trustee through the custody account and through the Issuer's securities account. The occurrence of different scenarios with regard to these Solana, the staking process and the claims to the security rights may affect the ability of the Issuer to meet its obligations under the product conditions. Although the Issuer undertakes to deposit a sufficient amount of Solana with BitGo Europe GmbH to cover all claims arising out of the product, there is a risk that the Solana deposited by the Issuer to hedge the product will not be sufficient to meet your redemption request or payment claims. A total loss of the invested capital is possible. There is no obligation to make further contributions. The product is not a deposit and is not subject to deposit protection.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10,000 is invested.

	If you cash in after 1 year	**If you cash in at the Recommended Holding Period**
Total costs	85 USD	2,504 USD
Annual cost impact (*)	0.85% each year	1.43% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 68.14% before costs and 66.71% after costs.

Composition of costs

One-off costs upon entry or exit		If you cash in after 1 year
Entry costs*	We do not charge an entry fee.	0 USD
Exit costs**	We do not charge an exit fee for this product, but the person selling you the product may do so.	0 USD
Ongoing costs		
Management fees and other administrative or operating costs	0.85% of the value of your investment per year.	85 USD
Transaction costs	There is no transaction cost for this product.	0 USD
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	0 USD

On the date of updating this key information document, the Issuer had not charged any one-off costs.

* Secondary-market investors trade directly with a participating broker or via a stock exchange and pay the fees charged by their broker. The trading margins are publicly available on the stock exchanges on which the product is listed, or can be requested from brokers. You can find out the actual costs from your broker, financial adviser or sales company.

** If an investor decides to terminate the product instead of selling it on the stock exchange or on the OTC market, they may have to pay a upfront redemption fee of EUR 100 (waived by the Issuer in certain situations) plus an exercise fee of 2.5%. Secondary-market investors trade directly with a participating broker or via a stock exchange and pay the fees charged by their broker. The trading margins are publicly available on the stock exchanges on which the product is listed, or can be requested from brokers. You can find out the actual costs from your broker, financial adviser or sales company.

How long should I hold it and can I take money out early?

The recommended holding period of the product is 5 years

However, since Solana are very volatile, investors should constantly monitor the value of the product, as sudden changes in value can occur frequently and abruptly.

Investors can sell the product on the regulated market on which it is listed. You can alternatively sell the product over the counter by submitting a redemption application to an Authorised Participant or directly to the Issuer and surrendering the product to them. You must instruct your custodian bank responsible for executing the order for the specified product accordingly. After execution, you will receive 0.05 Solana less 0.85% p.a. management fee, plus the accrued Staking Rewards, less repayment fees (calculated from the date of issue of the product) as described above under “What is this product?”.

Stock exchange listing	Frankfurt Stock Exchange; and from time to time additional stock exchanges	**Last trading day on the stock exchange**	One exchange trading day before the early redemption date, if the Issuer redeems the investment
Smallest tradable unit	1 unit of product	**Listing**	Listing per unit

In exceptional market situations or in the event of technical problems, it may be temporarily difficult or impossible to buy or sell the product.

How can I complain?

Complaints about the person/entity who/that advised you or sold the product to you may be lodged directly with the relevant person. Complaints regarding the product or behaviour of the Issuer of this product may be posted in writing to Bitwise Europe GmbH, Thurn- und Taxis-Platz 6, 60313 Frankfurt am Main, Germany, or emailed to eu-office@bitwiseinvestments.com. Complaints should include the name of the product, the ISIN and the reason for the complaint.

Other relevant information

Updated and additional documents relating to the product, particularly the prospectus and any supplements, are published on the https://bitwiseinvestments.eu website in accordance with the relevant statutory provisions. We recommend that you read these documents for more information, especially about the structure of the product and the risks associated with investing in the product.
