You are about to enter into a product that is not simple and may be difficult to understand.

What is this product?

Type

This product is an over the counter (OTC) contract – Foreign Exchange Instrument

Term

The maturity of this product is in 12 months. No party is entitled to terminate it unilaterally. Therefore, early termination of the contract is not possible.

Objectives

The purpose of the product is to give the investor the right and obligation to the outcome of the structure according to terms agreed in advance.
When the agreement is entered into, the amount, maximum rate, barrier rate and settlement date are agreed between the parties.
The investor will participate in any price development in the underlying. In other words, the investor will profit if the currency being bought strengthens against the currency being sold, or lose in the event of an opposite development.
The product involves the following cash flows:

If the FX spot rate is above the maximum rate you have the right to buy the Base Currency and sell the Price Currency at the maximum rate. If the FX Spot is trading below the barrier rate on the expiry date, you are obliged to buy the Base Currency and sell the Price Currency at the maximum rate. If the spot rate is between the maximum rate and the barrier rate, you will buy the Base Currency at the current exchange rate.

The Key Information Document does not contain information related to your specific trade in the product, and is intended only as an example.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product until the agreed settlement date.
You may not be able to end your product early. You may have to pay significant extra costs to end your product early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 7 out of 7, which is the highest risk class. We classify all OTC derivatives as being of the highest risk class. This rates the potential losses from future performance at a very high level, and poor market conditions are very unlikely to impact the capacity of DNB Bank ASA to pay you. In some circumstances you may be required to make further payments to pay for losses. The total loss you may incur may significantly exceed the amount invested.This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios
What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended Holding Period:	**12 months**	
Example Investment:	**EUR 10,000.00**	
Scenarios		**If you cash in at the Recommended Holding Period**
Minimum	**There is no minimum guaranteed return. You could lose part or all of your investment, or have to make further payments to cover your losses.**

	Percentage return	-7.56 %
Favourable	**What you might get back after costs**	354.00 EUR
	Percentage return	3.54 %

The scenarios presented are an estimate of future performance based on past experience of how the value of this product varies and are not an accurate indicator. What you get will vary depending on how the market develops and how long you keep the product.
The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor.
The figures do not take into account your personal tax situation, which may also affect how much you get back.
The stress scenario shows what you might get back in extreme market circumstances.
This product cannot be easily ended. If you exit the investment earlier than the recommended holding period you may have to pay extra costs.

What happens if DNB Bank ASA is unable to pay out?

You are exposed to the risk that the Issuer might be unable to fulfil its obligations in respect of the product –e.g. in the event of insolvency (inability to pay / over-indebtedness) or an administrative order of resolution measures. This may materially adversely affect the value of the product and could lead to you losing some or all of your investment in the product. This product is not subjected to any legal or other deposit protection scheme or any other form of guarantee.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time
The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
We have assumed:

- You would get back the amount that you invested (0 % annual return).
- EUR 10,000.00 is invested.
