<b>Produced:</b>	06/02/2026

**You are about to enter into a product that is not simple and may be difficult to understand.**

## What is this product?

### Type

This product is an over the counter (OTC) contract – Interest Rate Instrument

### Term

The maturity of this product is in 5 years. No party is entitled to terminate it unilaterally. Therefore, early termination of the contract is not possible.

### Objectives

The purpose of this product is to manage the interest rate risk.

A discount swap is a binding agreement to exchange periodical interest payments based on a notional amount Interest Payment Dates until the final maturity of the product.

You will pay fixed rate interest and receive variable interest rate (NIBOR) as long as the variable rate is lower than a pre-agreed level (barrier rate). If the variable rate is above the barrier level, you will pay the variable rate based on the notional and tenor and receive the variable rate interest for the period. The fixed rate of the discount swap is typically lower than the fixed rate of a similar interest rate swap at the inception of the product.

The cash flows of the product are as follows:

By entering into a discount swap, you will receive on the Interest Payment Dates interest payments based on the variable rate and the notional amount from DNB, provided that it is fixed at a positive value.

In return, you will pay to DNB on the Interest Payment Dates the fixed rate interest payments as long as the variable rate is lower than the barrier rate. If on an Interest Payment Date the variable rate is higher than the barrier rate, you will pay the variable rate for that interest period.

If the variable rate is fixed at a negative value, the interest payment, which you have to pay, will increase by the absolute value of the variable rate and at the same time you will not receive a payment from DNB.

The notional amount is neither paid by you nor by DNB, but serves for the purpose of calculation only.

The Key Information Document does not contain information related to your specific trade in the product, and is intended only as an example.

<b>Start Date</b>	09/02/2026	<b>Maturity Date</b>	07/02/2031
<b>Notional</b>	100,000.00 NOK	<b>Customer pays</b>	3.42 %
<b>Customer receives</b>	3-Month Nibor	<b>Barrier</b>	3.43 %

### Intended retail investor

The product is intended for retail investors who:

- i) wish to hedge against adverse interest rate fluctuations up to a pre-specified level
- ii) intend to hold the product for the recommended investment horizon (throughout the term/until maturity)
- iii) have knowledge and experience with this product
- iv) are willing and able to bear losses
- v) do not need products with capital protection

## What are the risks and what could I get in return?

### Risk indicator

The risk indicator assumes you keep the product until the agreed maturity date. You may not be able to end your product early. You may have to pay significant extra costs to end your product early.

← Lower risk

Higher risk →

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7, which is the highest risk class. We classify all OTC derivatives as being of the highest risk class. This rates the potential losses from future performance at a very high level, and poor market conditions are very unlikely to impact the capacity of DNB Bank ASA to pay you. In some circumstances you may be required to make further payments to pay for losses. The total loss you may incur may be significant. This product does not include any protection from future market performance so you could incur significant losses. If we are not able to pay you what is owed, you could incur significant losses.

### Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended Holding Period: Example Nominal Amount (*):		5 years NOK 10,000.00		
			If you exit after 1 year	If you exit at the Recommended Holding Period
<b>Scenarios</b>				
<b>Minimum</b>	<b>There is no minimum guaranteed return.</b>			
<b>Stress</b>	<b>What you might get back or pay after costs</b>			
	Average return / loss over nominal amount each year		-1,081.00 NOK	-679.00 NOK
			-10.81 %	-1.39 %
<b>Unfavourable</b>	<b>What you might get back or pay after costs</b>			
	Average return / loss over nominal amount each year		-242.00 NOK	-352.00 NOK
			-2.42 %	-0.71 %
<b>Moderate</b>	<b>What you might get back or pay after costs</b>			
	Average return / loss over nominal amount each year		-87.00 NOK	-36.00 NOK
			-0.87 %	-0.07 %
<b>Favourable</b>	<b>What you might get back or pay after costs</b>			
	Average return / loss over nominal amount each year		-18.00 NOK	0.00 NOK
			-0.18 %	0.00 %

The scenarios presented are an estimate of future performance based on past experience of how the value of this product varies and are not an accurate indicator. What you get will vary depending on how the market develops and how long you keep the product.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor.

The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

\* The calculation is based on the notional of the contract (in this example NOK 10,000.00).

### What happens if DNB Bank ASA is unable to pay out?

You are exposed to the risk that the Issuer might be unable to fulfil its obligations in respect of the product –e.g. in the event of insolvency (inability to pay / over-indebtedness) or an administrative order of resolution measures. This may materially adversely affect the value of the product and could lead to significant losses in the product. This product is not subjected to any legal or other deposit protection scheme or any other form of guarantee.

### What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your product.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example nominal amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- NOK 10,000.00 is invested.

	If you exit at the Recommended Holding Period
<b>Total costs</b>	110.00 NOK
<b>Annual cost impact (*)(**)</b>	0.2207 % each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.15 % before costs and -0.07 % after costs.

(\*\*) This illustrates costs in relation to the notional value of the PRIIP.

### Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
<b>Entry costs</b>	These costs are included in the price of the product.	110.00 NOK
<b>Exit costs</b>	These costs are already included in the rates you get.	0.00 NOK
<b>Ongoing costs</b>		
<b>Management fees and other administrative or operating costs</b>	There is no management fee for this product.	0.00 NOK

<b>Transaction costs</b>	0 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	0.00 NOK
<b>Incidental costs taken under specific conditions</b>		
<b>Performance fees</b>	There is no performance fee for this product.	0.00 NOK

#### How long should I hold it and can I take money out early?

##### Recommended Holding Period: 5 years

This product is designed to be held to the agreed settlement date. This product cannot be easily ended. This means it is difficult to estimate how much you would get if you end before the end of the recommended holding period. You will either be unable to end early or you will have to pay high costs or make a large loss if you do so.

#### How can I complain?

Any complaint regarding the person advising on, or selling, the product can be submitted directly to that person. Any complaint regarding the product or the conduct of the issuer of this product can be submitted in text form to DNB Bank ASA under the following address: DNB Bank ASA P.O. Box 1600 Sentrum, N-0021 Oslo, attention: DNB Carnegie.

#### Other relevant information

Any additional documentation in relation to the product is published on the Issuer's website ([www.dnb.no](http://www.dnb.no)). In order to obtain more detailed information - and in particular details of the structure of and risks associated with the product - you should read these documents. The information contained in this Key Information Document does not constitute a recommendation to buy or sell the product and is no substitute for individual consultation with your bank or advisor.
