

# Key Information Document

## Interest Rate Cap 6 year

### Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

### Product

**Name of Product:** Interest Rate Cap 6 year

**Name of PRIIP Manufacturer:** Coöperatieve Rabobank U.A. ('Rabobank')

**Contact:** For more information go to our website [www.rabobank.nl/priips](http://www.rabobank.nl/priips) or call +31 (30) 7123673

**Regulated by:** Dutch Authority for the Financial Markets is responsible for supervising Rabobank in relation to this Key Information Document

**Date of Production of the KID:** 09-Jun-2026

**You are about to purchase a product that is not simple and may be difficult to understand.**

### What is this product?

**Type:** OTC - Derivatives contract (OTC means over the counter and indicates that the transaction is not executed on a trading platform).

**Term:** The maturity date (expiration date) of the product will be agreed upon when entering the Interest Rate Cap 6 year contract, with the intention of holding the Interest Rate Cap 6 year until the maturity date.

**Objectives:**

**Purpose:** The Interest Rate Cap 6 year is used to limit the risk of an increasing interest rate.

*When you enter into an Interest Rate Cap 6 year with us some of the elements that are agreed upon are as follows:*

- The level of the interest rate ceiling ('Cap level')
- The start and end date of the Interest Rate Cap 6 year
- The dates and the periods for which the floating interest rate will be fixed ('interest rate fixing date')
- The notional of the Interest Rate Cap 6 year
- The interest rate which is used as reference ('reference rate')
- The amount of one-off premium which you pay to Rabobank upfront
- You do not have any payment obligations regarding the Interest Rate Cap 6 year during the term

**Method:** With an Interest Rate Cap 6 year you agree on a ceiling for a certain reference rate. If the floating interest rate exceeds the ceiling you will receive a compensation. The most used reference rate index is Euribor. Euribor rates are set and published every day.

*This can lead to the following outcomes:*

- If the floating interest rate at the interest rate fixing date is higher than the Cap level agreed upon, you will receive the difference between the floating interest rate and the Cap level calculated over the notional from Rabobank.
- If the floating interest rate at the interest rate fixing date is lower than the Cap level agreed upon, you will not receive any payment regarding the Interest Rate Cap 6 year over that period.

In this Key Information Document we chose for a constant notional during the tenor, the 3 months Euribor as a reference rate and a strike equal to the interest rate of an Interest Rate Swap with the same modalities (we call this the at-the-money strike).

**Return:** The sum of the interest received by you during the term of the product minus the premium.

**Termination:** You can always end the Interest Rate Cap 6 year unless you have agreed otherwise with Rabobank. For more information on the effects of termination please read the section 'How long should I hold it and can I withdraw money earlier?'. An Interest Rate Cap 6 year can be unilaterally ended or adjusted by Rabobank. This is only possible in the situations described in the Financial Derivatives Agreement (FDA).

The amounts and other details in this document are used for indicative purposes. The calculations assume a notional amount of EUR 10,000 and a term of 6 years. These details probably differ from the ones in your agreement with Rabobank. The example is for illustrative purposes only.

### Intended retail investor:

To make use of this product, you are required to be a Rabobank client and you must have been given access to the product. The product description should be read in advance, so that you understand how this product works and understand the risks. Additionally, we expect you to understand the concept of hedging risks and how this product can be used for hedging. Moreover, you should understand which factors influence the price of a contract (such as time to expiration, volatility, time value of money and notional amount). You should also understand the basis of currency-, interest rate-, liquidity- and country risk. Furthermore, you should understand how market value is established, and that this product is a bilateral contract between you and Rabobank.

This product must be used for hedging purposes only; you may hedge up to a maximum of 100% of the underlying risk. The maximum time to expiration is three years; a transaction with a time to expiration longer than two years requires approval by Rabobank. With this product you are minimizing currency risk by having the right to buy or sell the notional amount at the predetermined exchange rate and date. As such, you do not profit nor experience negative effects from future exchange rate fluctuations. You may lose 100% of the invested amount; in certain cases you may lose more.

The recommended holding period for the Interest Rate Cap 6 year is equal to the duration of the underlying risk. In our example we use 6 years for this period.

### What are the risks and what could I get in return?

#### Risk indicator

1	2	3	4	5	6	7
---	---	---	---	---	---	---

← Lower risk Higher risk →

 The risk indicator assumes you keep the product until the agreed maturity date.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 7 out of 7, which is the highest risk class. We classify all OTC derivatives as being of the highest risk class. This rates the potential losses from future performance at a very high level, and poor market conditions could impact the capacity of Rabobank to pay you. This product requires an initial investment.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

#### Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

#### Example: Nominal Amount 10,000 EUR Scenarios 6 years (Recommended Holding Period)

<b>Minimum Stress</b>	<b>There is no minimum guaranteed return. You could lose part or all of your investment.</b>		
	<b>What you might get back after costs</b>	0.00 EUR	0.00 EUR
	Average return each year	-100.00%	-100.00%
<b>Unfavourable</b>	<b>What you might get back after costs</b>	1,309.00 EUR	0.00 EUR
	Average return each year	-86.91%	-100.00%
<b>Moderate</b>	<b>What you might get back after costs</b>	5,786.00 EUR	2,351.00 EUR
	Average return each year	-42.14%	-21.42%
<b>Favourable</b>	<b>What you might get back after costs</b>	16,229.00 EUR	22,980.00 EUR
	Average return each year	62.29%	14.86%

\* The potential return is calculated as the net profit or loss as a percentage over the notional amount.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. This product cannot be easily ended. If you exit the investment earlier than the recommended holding period you may have to pay extra costs.

#### What happens if Rabobank is unable to pay out?

When Rabobank is not able to meet its obligations, the payments to be made by Rabobank are not covered by the Dutch Investor Compensation Scheme (beleggerscompensatiestelsel) or any other government or private protection scheme or guarantee. This means you could incur a significant loss.

#### What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

#### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- Recommended Holding Period: 6 years
- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10,000 EUR is invested.

Notional Amount 10,000 EUR

If you cash in after the Recommended Holding Period

Total costs		225.00 EUR
Annual cost impact (*)		0.3814% each year
(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -33.31% before costs and -33.69% after costs.		
<i>Composition of costs:</i>		
<b>Notional Amount 10,000 EUR</b>		<b>If you cash in after 1 year</b>
<b>One-off costs upon entry or exit</b>		
Entry costs	The amount you pay in when entering this notional amount.*	225.00 EUR
Exit costs	We do not charge any exit fee for this product, but the person selling you the product may do so	0.00 EUR
<b>Ongoing costs</b>		
Management fees and other administrative or operating costs	Fees and costs over the value of your investment per year. This is an estimate based on actual costs over the last year.	0.00 EUR
Transaction costs	Costs over the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investment for the product. The actual amount will vary depending on how much we buy and sell.	0.00 EUR
<b>Incidental costs taken under specific conditions</b>		
Performance fees	There is no performance fee for this product.	0.00 EUR

\*This illustrates costs in relation to the invested amount of the PRIIP.

#### **How long should I hold it and can I take money out early?**

In our example we use 6 years for this period. The Interest Rate Cap 6 year is intended to hold until the end date in order to hedge the currency risk. The end date will be agreed with you.

The product cannot be ended; however, you can always enter an opposite transaction. By doing this you enter a new opposite transaction. The tenor of this new transaction equals the remaining term of the original transaction.

#### **How can I complain?**

Do you have a complaint about the information provided or the functioning of the product? You can file a complaint at the website: [www.rabobank.nl/klachtbedrijven](http://www.rabobank.nl/klachtbedrijven) or send an e-mail to [treasury@rabobank.nl](mailto:treasury@rabobank.nl) or via the following postal address: Rabobank Klachtenservice, Antwoordnummer 750, 3500 ZJ Utrecht. We will then handle your complaint and provide you with feedback as soon as possible.

#### **Other relevant information**

This document should be read as an introduction. The decision to enter the Interest Rate Cap 6 year or not should amongst others be based on all information provided by Rabobank. More information about the Interest Rate Cap 6 year, the market value and how you can use the product, can be found in the product leaflet. Please request your advisor for the brochure Currency Risk Management to read about our services. The product leaflet and brochure are only available in Dutch. You can request a paper version of the Key Information Document free of charge.
